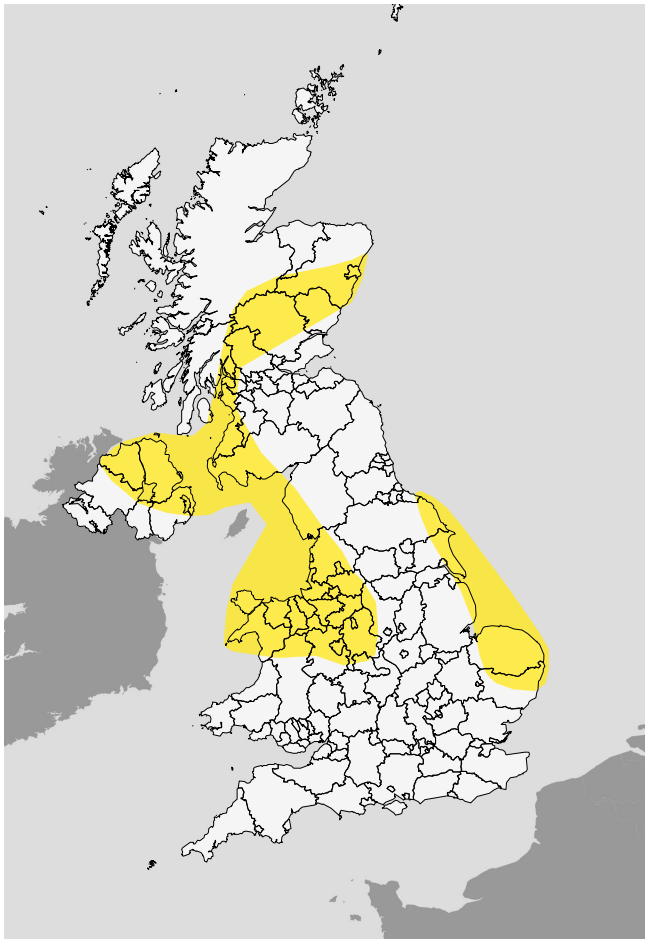
Yellow warning
Ice

Between
16:00 Wed 20 Nov 2024 and
10:00 Thu 21 Nov 2024



Icy stretches will lead to some difficult travelling conditions.

What to expect

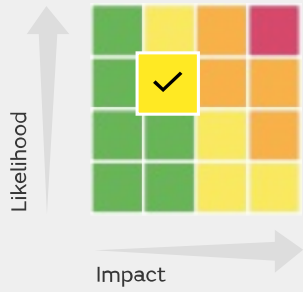
- Probably some icy patches on some untreated roads, pavements and cycle paths
- Some injuries from slips and falls on icy surfaces

Further details

Icy stretches are expected to form on untreated surfaces during Wednesday evening and overnight into Thursday as temperatures drop below freezing. A few sleet or snow showers are also likely at times, particularly close to coasts.

What should I do?

Keep yourself and your family safe when it is icy. Plan to leave the house at least five minutes earlier than normal. Not needing to rush, reduces your risk of accidents, slips, and falls.



Medium likelihood of low impacts

Issued at 10:06 Wed 20 Nov, 2024

Yellow warning
Ice

Between
16:00 Wed 20 Nov 2024 and
10:00 Thu 21 Nov 2024

Further Details (continued)

If you need to make a journey on foot, try to use pavements along main roads which are likely to be less slippery. Similarly, if cycling, try and stick to main roads which are more likely to have been treated.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

Be prepared for weather warnings to change: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
